

ifa and integration.AG are the exclusive IT providers to EUREQUO (European Registry of Quality Outcomes in Cataract and Refractive Surgery), the largest IT project in eye care worldwide. EUREQUO is sponsored by the ESCRS (European Society of Cataract and Refractive Society) and the European Union in the framework of the Public Health Programme.

EUREQUO is completely web based and has been developed using the latest technology. The project will be implemented as a quality assurance system in 16 countries throughout Europe.

At the ESCRS Congress in Barcelona in September 2009, the EUREQUO web application was officially presented to a large number of future participants from all over Europe. Since September 2009, cataract and refractive surgeons from the pilot countries Spain and the Netherlands as well as the Scandinavian countries can collect their data in EUREQUO. At the end of 2009/beginning 2010, the other member countries will follow. Exclusive IT provider of EUREQUO (software and hosting): ifa systems AG and integration.AG (ifa group) For more information please visit the EUREQUO website at www.eurequo.org.

With EUREQUO, quality outcome reports are generated with sophisticated tools which are based on over 12 years experience in eye care data management. Please see an example of quality outcome graphs below:
